

Flinken Thin Plaster

Product Introduction

FLINKEN® Thin Plaster premix mortar made from special polymer modified cementitious adhesive with well graded silica sand and calcium carbonate for thin finishing plaster. Suitable for beam, column, slab, shear wall, AAC Block plaster etc.

Mixing Guide

1. Mix one bag (40kgs) of THIN PLASTER with approximately 11-12 litres of clean water.
2. Mix continuously 3-5 minutes until a uniform paste is achieved and ensure the mix is from lumps.
3. Placing should be completed within 30 minutes after start of mixing.

Product Specification

Brand	FLINKEN
Type	GP- General purpose rendering and plastering mortar for internal and external use
Rating	Excellent Workability, Define, Durable
Dry Bulk Density	1500 - 1800 kg/m ³
Compressive Strength	Categories CS IV ≥ 6.0 N/mm ²
Adhesion	0.5 N/mm ²
Fracture Pattern	B Cohesive Fracture
Capillary Water Absorption	Categories W0
Water Vapour Permeability	2.0 μ
Workable Life	60 minutes
Air Content	10% - 15%
Coverage Area	11 -13 m ² (for 2mm thickness)
Shelf Life	6 months *If stored in Tdry conditions in the original and unopened bags.
